ReadMe

Releases
In the "dist/" directory there are folders for each release. In each release folder there is an apk-file, release notes and a Test Report (release 2 and onwards).

For the final scrum documents and the Post Mortem Report, see the "docs/reviewcandidates" folder.
The documents for earlier sprint can be found by traversing the Git history. This is easily done by using the tags for each release.

Our scrum tools
Scrum board - https://www.pivotaltracker.com/s/projects/909894
Please note that there are more stories in the icebox, and that the tool automatically moves tasks from the backlog to the current sprint.

Other
Please observe that you can not test the app on Eduroam as it does not allow anything but well known protocols. Any other network, including mobile hotspots should work.
